**Brainstorm & Idea Prioritization Template:**

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich number of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

**Step-1: Team Gathering, Collaboration and Select the Problem Statement**

**Problem Statement**

Since I am developing this project individually, I conducted research on existing complaint management systems used by organizations and public service departments. I identified common issues faced by users during complaint registration and tracking, and selected the MERN Stack to build a secure, user-friendly, and efficient solution.

**Main Goal**

To develop a secure web application that enables users to register complaints, track their complaint status in real time, receive feedback, and communicate efficiently with administrators and agents.

**Problems with Existing Complaint Systems**

- Manual complaint registration consumes time and increases paperwork.
- Users cannot easily track the progress of their complaints.
- Complaints are often assigned manually, causing delays.
- Lack of transparency in complaint resolution.
- Poor communication between users, agents, and administrators.
- Weak authentication and data security in traditional systems.

**Proposed Solution**

The Online Complaint Registration and Management System provides:

**Users can:**

- Register and log in securely.
- Submit complaints online.
- Track complaint status.
- View feedback from administrators.
- Update profile information.

**Administrators can:**

- View all complaints.
- Assign complaints to agents.
- Update complaint details.
- Monitor complaint statistics.
- Manage the complete complaint lifecycle.

**Agents can:**

- View only complaints assigned to them.
- Update complaint status.
- Resolve complaints efficiently.
- Provide progress updates.

**Step-2: Brainstorming & Grouping Ideas**

I identified all required system features and grouped them into functional categories.

**User Module**

- **User Registration**
- Secure Login
- Complaint Submission
- Complaint Tracking
- Profile Management

**Selected:** Complete User Module

**Complaint Module**

- Complaint Registration
- Category Selection
- Complaint Description
- Status Tracking
- Complaint History

**Selected:** Complete Complaint Module

## **Admin Module**

- Dashboard
- Complaint Management
- Assign Complaints
- Update Complaint Details
- Monitor Complaint Statistics

**Selected:** Dashboard, Complaint Assignment, Complaint Management

## **Agent Module**

- View Assigned Complaints
- Update Complaint Status
- Resolve Complaints
- Track Assigned Work

**Selected:** Complete Agent Module

## **Security Module**

- JWT Authentication
- Password Encryption
- Role-Based Access Control
- Protected Routes

**Selected:** Complete Security Module

## **User Experience**

- Responsive Design
- Clean Dashboard
- Easy Navigation
- Mobile Friendly Interface

**Selected:** Responsive and User-Friendly Interface

### Step-3: Prioritizing the Features

| Feature                   | Value to User | Technical Feasibility | Final Priority |
|---------------------------|---------------|-----------------------|----------------|
| User Registration & Login | High          | High                  | High           |
| Complaint Registration    | High          | High                  | High           |
| Complaint Tracking        | High          | High                  | High           |
| Admin Dashboard           | High          | High                  | High           |
| Agent Dashboard           | High          | High                  | High           |
| Complaint Assignment      | High          | High                  | High           |
| Complaint Status Update   | High          | High                  | High           |
| Feedback System           | Medium        | High                  | Medium         |
| Profile Management        | Medium        | High                  | Medium         |
| Complaint Statistics      | Medium        | Medium                | Medium         |

### Final Outcome

This brainstorming and prioritization process helped identify the essential features required for the Online Complaint Registration and Management System. By focusing first on secure authentication, complaint registration, complaint assignment, status tracking, and role-based access control, the system ensures efficient complaint handling while maintaining simplicity, security, and scalability. Additional features such as enhanced analytics and notifications can be incorporated in future versions.
