

Project Design Phase
Proposed Solution Template

Date	20 JUNE 2026
Team ID	INDIVIDUAL PROJECT
Project Name	Online Complaint Registration and Management System
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Citizens often face delays, lack of transparency, and difficulty tracking the status of complaints submitted to government departments. Manual processes and limited communication channels lead to frustration and unresolved issues.
2.	Idea / Solution description	The Online Complaint Registration and Management System is a web-based platform that enables users to register complaints, track progress, and receive timely updates. Built using the MERN Stack (MongoDB, Express.js, React.js, Node.js), it includes secure authentication, role-based dashboards for admins and agents, and automated notifications for complaint status changes.
3.	Novelty / Uniqueness	The system ensures transparency and efficiency through real-time tracking, secure data handling, and automated complaint assignment. It integrates user feedback and analytics to improve resolution speed and accountability. The interface is designed to be intuitive and mobile-friendly.
4.	Social Impact / Customer Satisfaction	This platform empowers citizens by simplifying complaint submission and ensuring fair resolution. It enhances trust in public services, reduces manual workload for authorities, and promotes digital governance. Users experience improved satisfaction through timely updates and secure communication.
5.	Business Model (Revenue Model)	The system can be offered as a subscription-based service to government departments or organizations. Additional revenue streams include customization fees, maintenance contracts, and analytics

		dashboards for performance insights.
6.	Scalability of the Solution	The modular architecture and cloud-based database allow easy expansion to handle more users, departments, and complaint categories. Future upgrades can include AI-based complaint prioritization, multilingual support, and integration with mobile apps for broader accessibility.
