

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	21 JUNE 2026
Team ID	INDIVIDUAL PROJECT
Project Name	Online Complaint Registration and Management System
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	• Registration through secure form. • Validation using unique email ID. • Citizen profile creation with contact details and complaint history.
FR-2	User Login & Authentication	• Secure login using email and password. • Password recovery module. • Stateless JWT- based session authentication.
FR-3	Complaint Submission	• Complaint form with category selection (e.g., sanitation, electricity, water). • File upload for evidence (images, documents). • Auto- generation of unique complaint ID.
FR-4	Complaint Tracking	• Real- time status updates (Pending → In Progress → Resolved). • Timeline view for complaint progress. • Citizen feedback option after resolution.
FR-5	Admin Dashboard	• View all complaints and assign agents. • Monitor resolution timelines. • Generate performance reports.
FR-6	Agent Dashboard	• View assigned complaints. • Update complaint status and add resolution notes. • Communicate with admin for escalations.

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	The system must provide a clean, intuitive, and mobile- friendly interface for citizens and administrators.
NFR-2	Security	All user data and complaint records must be protected using JWT authentication, HTTPS encryption, and secure database access.
NFR-3	Reliability	The system must ensure consistent performance and accurate complaint tracking without data loss or downtime.
NFR-4	Performance	Complaint submission and tracking queries should execute within 250 ms to maintain responsiveness.
NFR-5	Availability	The platform must maintain 99.9% uptime, accessible across devices and browsers.
NFR-6	Scalability	The architecture must support horizontal scaling to handle increasing user traffic and complaint volume.
